## Viewing cable 08BUENOSAIRES1197, ARGENTINE SPACE AGENCY DESIRE TO INCLUDE

If you are new to these pages, please read an introduction on the [structure of a cable](#) as well as how to [discuss them](#) with others. See also the [FAQs](#)

### Understanding cables

Every cable message consists of three parts:

- The top box shows each cables unique reference number, when and by whom it originally was sent, and what its initial classification was.
- The middle box contains the header information that is associated with the cable. It includes information about the receiver(s) as well as a general subject.
- The bottom box presents the body of the cable. The opening can contain a more specific subject, references to other cables ([browse by origin](#) to find them) or additional comment. This is followed by the main contents of the cable: a summary, a collection of specific topics and a comment section.

To understand the justification used for the classification of each cable, please use this [WikiSource](#) article as reference.

### Discussing cables

If you find meaningful or important information in a cable, please link directly to its unique reference number. Linking to a specific paragraph in the body of a cable is also possible by copying the appropriate link (to be found at the paragraph symbol). Please mark messages for social networking services like Twitter with the hash tags **#cablegate** and a hash containing the reference ID e.g. #08BUENOSAIRES1197.

SUBJECT: ARGENTINE SPACE AGENCY DESIRE TO INCLUDE  
BRAZILIAN-UKRAINIAN JOINT VENTURE IN END-USER REQUEST FOR  
ARGENTINE SAOCOM SATELLITE MISSION

REF: NONE

Classified By: DCM Thomas P. Kelly, for reasons 1.4 (c) and (d).

[¶1. \(C\) On 01 August, Executive Director of the National](#)

Commission on Aerospace Activities (CONAE), Dr. Conrado Varotto and CONAE Secretary General Felix Menicocci, made a request to broaden the scope of an existing End-User request related to the Argentine SAOCOM satellite project. Per Varotto, the GOA had drafted the text for an open tender which conformed to existing International Trade in Arms Regulations (ITAR) standards with regard to the use of U.S.-made components in the SAOCOM satellite system. At the time of the original draft, the GOA did not take into account the possible use of the Ukrainian Cyclone-4 launch vehicle or the use of the Brazilian launch facilities at Alcantara.

¶2. (C) To allow the joint Brazilian-Ukrainian venture, Alcantara Cyclone Space, to compete in the Argentine SAOCOM project, the GOA has proposed changes in the text of their original End-User request. Varotto believed the updated text will permit the sale of U.S. components to the GOA for use in SAOCOM, and will account for the possible participation of Alcantara Cyclone Space in an eventual launch. Varotto expressed his interest in traveling to Washington to discuss the details with relevant Department officials.
